

General

Minimum activity
(stocking/production)

General

Bureaucracy - Keeping
records

Livestock and dairy

Manure spreading
(quantity and time)

Arable

Soil management

Hedges, ditches and
ponds surrounded by
strips, without ploughing,
fertilizing and using
herbicides

NVZ areas = NVZ plan
with additional care to
manure management
and use of fertilizers

Sheep ID and cattle
movements

Use of chemicals

Permanent pasture – Not a challenge for extensive livestock systems. Farmers without permanent pasture are planning to follow the crop diversification rule

Crop diversification - Exploring the possibilities of having additional crops which are financially viable

EFA – Exploring the possibility of using existent areas of hedges, ditches, ponds, woodlands and AES as EFA

General

Crop diversification

Livestock and dairy

Maximum livestock stocking

Arable

Keep field corners

Establishing bird boxes
and fencing woodlands

Maintain permanent pasture
and ridge and furrow

Flower fields/Pollen and
Nectar/Wild bird cover

Organic farming (orchard)

Fencing access to river

Additional/wider strips
